

Auto Provision

To configure the IP phone please find the below steps:

- It is recommended that the IP phone be reset to factory settings to erase the old configuration.
- In Yealink IP phone go to menu -> settings->advance settings->reset configuration
- Login to the online portal, hover the cursor over **PHONE SYSTEM** and click on “**List of extensions**”.

- Then, select the desired Extension and click on **ACTION** and select **AUTO PROVISION** from the drop down as shown below.

Ext/ Destination	Display Name	Action
101	101	Action
102	102	Action
103	103	<ul style="list-style-type: none"> Extension Setting Follow Me Setting Voicemail Settings Update Caller ID Voicemail List Call Reports Delete Auto Provision SMS Dashboard
104	104	
105	105	

- Once you click on Auto Provision, enter the required details (Device Name, Device Model & Phone MAC Address) and click on update.

NOTE

Auto Provision
Begin time should be earlier than end time!

When the IP phone is triggered to perform auto provisioning, it will request to download the configuration files from the provisioning server. During the auto provisioning, the IP phone will download and update configuration files to the phone flash.
